

ROAD EQUIPMENT > REFLECTORS

Reflector mobile protection systems

The reflectors make an important contribution for a better visibility of mobile protection systems and thus for more safety on roads. By the assembly of the reflectors at the mobile protection system, e.g. on a concrete wall, the visibility is increased, an additional guideline is created and thereby the risk of accidents is minimized clearly.

The reflectors for mobile protection systems are standard available in **yellow or white** and certified by German Road Administration (**BAST**). Both executions are available for screwing on as well for gluing on.

Screwing

Within this variant the reflector is fastened by screws or bolts to the concrete wall.

Gluing

The variant to glue on has a flexible glue material on the lower surface of the case (butyl tape strip).

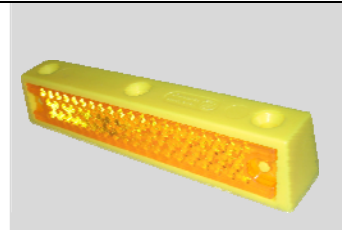

Directly before assembling at the mobile protection system the protection strip has to be removed and the reflector is applied by pressing on.

» Executions

Our reflectors are standard available in the following executions.

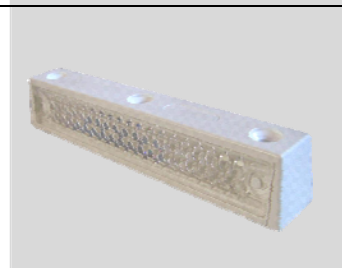

Reflector in yellow

- Yellow case in the dimension 130 x 22mm
- Yellow reflector one-sided or both-sided in the dimension 120 x 18mm
- Reflector BAST-proofed
- Available for screwing or gluing on (butyl tape strip)
- Hole diameter 5,5mm

Reflector in white

- White case in the dimension 130 x 22mm
- White reflector one-sided or both-sided in the dimension 120 x 18mm
- Reflector BAST-proofed
- Available for screwing or gluing on (butyl tape strip)
- Hole diameter 5,5mm
