

ROAD EQUIPMENT > REFLECTORS

Impact resistant reflectors

For a better protection from stone-chipping or other external influences all Beilharz delineators can be equipped with impact resistant reflectors. The scratch-proofed multiple-cell reflector, made of a special plastic mixture, is water-proofed and hermetically welded. So the reflector convinces by his impassivity also during intensive impacts or strong shock loading.

Dimension

The long reflector is available in the dimension 40 x 180mm, 80 x 120 mm or 80 x 240mm. The round reflector is available with a diameter of 60mm or 80mm.

Executions

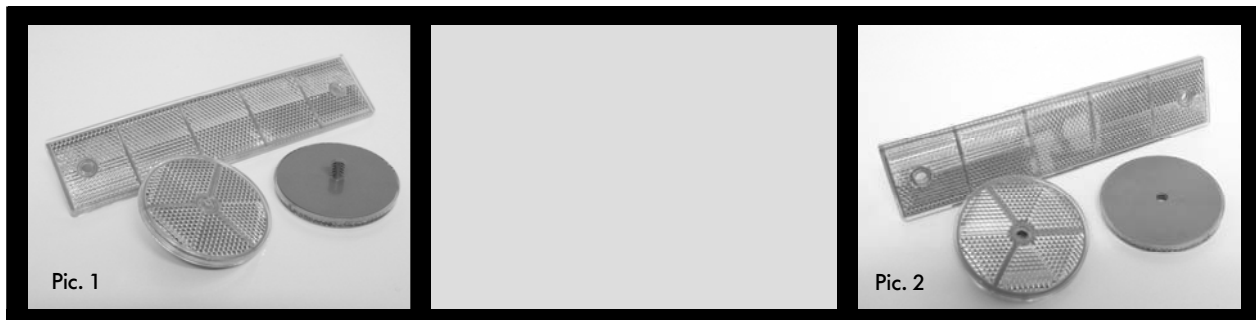

The impact resistant reflectors are available as Click-reflectors as well as execution for riveting or screwing. .

Colours

The reflectors are standard available in white, other colours on request.

Certified

The impact resistant multiple-cell reflectors reach the required, best possible retro-reflexion values of class 2 according to DIN-EN-12899-3. They are proofed and certified by German administration (BAST).
